DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Robert Luke Walker on 8/10/06

AMENDMENT TO CLAIM 47:

In claim 47, lines 13, after "wherein" delete "said".

2. This application has been examined. The claims 2-10, 13-22, 24-25, 27-41, 43-44 and 46-48 are allowed.

Reasons For Allowance

3. The following is an examiner's statement of reasons for allowance: The present invention is directed to an electronic communication and user interface kit, comprising a portable container; a wired communications network integrated into said container; a first transceiver located in said container, said first transceiver being connected to said wired communications network; a display device disposed in the container and having a display interface; a plurality of separate electronic devices disposed in said container, said electronic devices each being capable

of transferring display information to said display interface via one of said communication network. The closest prior art of Wiemer et al. (US 5,872,557) shows a similar invention, however, he fails to teach a second transceiver, said display and display interface being operatively connected, said second transceiver being capable of communicating with said first transceiver, said display interface being switchable between a first state, wherein said display interface is operatively connected to said communications network and is disconnected from said second transceiver, and a second state, wherein said display interface is operatively connected to said second transceiver and disconnected from said communication network as claim 47, or said second transceiver being capable of communicating with said first transceiver, said display interface being switchable between a first state, wherein said display interface being switchable between a first state, wherein said display interface is operatively connected to said communications and power distribution networks and is disconnected from said power source and said second transceiver, and a second state, wherein said display interface is operatively connected to said power source and said second transceiver and is disconnected from said communications and power distribution network as claim 48.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
